

# DURABLE THIN SURFACE COURSE SYSTEM

**VIATEX<sup>®</sup> is superbly engineered to meet the high specification requirements of today's ever growing UK road network.**

With proven performance on some of Britain's busiest roads the VIATEX<sup>®</sup> thin surface course system offers significant benefits to road users, installation contractors and the highways specifying authority.

The high quality materials used in our VIATEX<sup>®</sup> solution create a stable structure which results in a material which performs with a high resistance to rutting, excellent durability and the ability to achieve a texture depth designed to meet even the most demanding specifications.

## BENEFITS:

- Excellent high and low speed skid resistance
- Reduced noise
- Reduced spray
- Deformation resistance
- Long term durability
- 5 year warranty for integrity (clause 942 of the SHW)
- 2 year warranty for surface texture
- Proven track record on UK motorways and trunk roads

Keeping Britain's drivers safe; VIATEX<sup>®</sup> has a highly skid resistant surface and also reduces spray in wet conditions. VIATEX<sup>®</sup> also makes an important contribution to noise reduction objectives on the UK road network.

Viatex's blend of high quality aggregate, 40/60 grade bitumen and cellulose fibre is available in 14mm and 10mm nominal aggregate sizes, which can be installed by a CEMEX approved contractor.

CEMEX never compromise on quality and we are proud to say we have the BBA stamp of approval for this and other VIA products in our extensive range.

## APPLICATIONS:

MOTORWAYS

TRUNK ROADS

LOCAL AUTHORITY ROADS

Also available with our eco enhancements;

Low temperature

or

Enhanced workability
