EXPERTS IN YOUR FIELD

With CEMEX you can be assured of getting the best range of farming and agricultural material solutions available.

Specifically designed to high specifications for a variety of end uses, both internal and external, our high strength, durable concrete, asphalt and aggregate products meet the many challenging needs of modern farming.

QUALITY SCHEME READY MIXED CONCRETE : CEMEX is a member of the Quality Scheme for Ready Mixed Concrete, all our products carry this accreditation.

PAVING	LIVESTOCK	STORAGE	WASTE
High strength, durable products for external paved areas.	Durable, hard wearing products designed for livestock housing.	High strength durable, load bearing products for use on internal floors.	Hard wearing, durable products, resistant to farm waste.
FARMPAVE 3 a durable concrete for use on external paved areas	STOCKFLOOR 4 a hard wearing concrete designed to satisfy hygiene standards in livestock housing	MULTISTORE 4 a durable and load bearing concrete for use on internal concrete floors for storage requirements	VIASHIELD 6 a hard wearing asphalt offering durability and resistance to attack from acids
ADVANCED PAVING 5 a fibre-reinforced concrete for external ground supported slabs	ADVANCED FLOORING 5 a fibre-reinforced concrete for internal ground supported slabs	ADVANCED FLOORING 5 a fibre-reinforced concrete for internal ground supported slabs	VIASHIELD 6 a hard wearing asphalt offering durability and resistance to attack from acids
	VIASHIELD 6 a hard wearing asphalt offering durability and resistance to attack from acids	VIASHIELD 6 a hard wearing asphalt offering durability and resistance to attack from acids	
	NEOGEM 7 our brand of premium and high-performance aggregates, including a high-quality blend of sand-based cattle bedding. Plus, Neutra-Agg a 100% natural aglime fertiliser solution		

READYMIX FARMPAVE

Readymix Farmpave is a durable concrete for use on external paved areas subjected to the constant loading and scraping imposed by farm vehicles and machinery.

It is also designed to resist damage from frost and the aggressive conditions found in an agricultural environment. Readymix Farmpave reflects the growing emphasis on statutory regulation and farm assurance schemes and makes selection of the appropriate product simple, yet effective.

APPLICATIONS

- Yards and aprons
- Roadways
- Loading bays
- Pathways

FEATURES AND BENEFITS

- Withstanding heavy trafficking
- Durable and highly resistant to freeze/thaw damage and excessive weathering
- High quality cleanable surface finish, increasing paving asset value
- Surface can be textured for increased slip resistance
- Can be formed in order to assist drainage and surface water control
- Meets or exceeds the relevant British and European Standards

ADDING FIBRES – ADDITIONAL FEATURES AND BENEFITS

- Reduced plastic cracking
- No need for crack control wire mesh
- Impact and abrasion resistant
- Enhanced surface finish
- Enhanced durability from increased farm machinery trafficking

READYMIX STOCKFLOOR

Readymix Stockfloor is a durable, hard wearing concrete designed to satisfy the standards of hygiene in livestock housing including the Food Safety Act and Quality Assurance schemes and makes selection of the appropriate product simple, yet effective.

APPLICATIONS

- Livestock housing and passages
- Bedded yards
- Cubicles and livestock handling systems

FEATURES AND BENEFITS

- High workability for ease of placing
- Durable with longer working life in aggressive conditions
- Surface can be textured for increased slip resistance, reducing risk of animal injury
- Aids compliance with QA schemes and Welfare of Livestock Regulations

MULTISTORE

Readymix Multistore is a high strength durable and load bearing concrete for use on internal concrete floors for general and specific storage requirements. With a good structural design and the use of Readymix Multistore, a hygienic cleanable storage facility can be created, providing a barrier between ground water and the stored material.

APPLICATIONS

- Grain and animal feed stores
- Fertiliser stocking areas
- Root crop storage
- General storage areas

FEATURES AND BENEFITS

- Quality finish withstanding loads imposed by weight of crop or agricultural machinery
- Durable surface for continuous trafficking
- Suitable surface for handling and loading
- Aids compliance with QA schemes such as the Assured Combinable Crops Scheme where a crack, crevice free and cleanable surface is required. It also satisfies the requirements of the Food Safety Act

ADDING FIBRES – ADDITIONAL FEATURES AND BENEFITS

- Reduced surface cracking aids cleaning and maintains hygiene levels
- No need for crack control wire mesh
- Improved resistance to abrasion from vehicles and animals
- Enhanced surface finish
- Enhanced durability
- Meets or exceeds the relevant British and European Standards

READYMIX ADVANCED PAVING

Advanced Paving is a fibre-reinforced concrete for external ground supported slabs without the need for steel mesh. This delivers a significant reduction in reinforcement costs as well as faster and easier placement.

APPLICATIONS

- External ground supported slabs (pavements, yards and hard standings)
- Farm yards and roadways

ADVANCED FLOORING

Advanced Flooring is a fibre-reinforced concrete for internal ground supported slabs without the need for steel mesh. This delivers a significant reduction in reinforcement costs as well as faster and easier placement.

APPLICATIONS

- General industrial flooring
- Workshop flooring
- Farm building flooring
- Domestic flooring

FEATURES AND BENEFITS

- Concrete and reinforcement is placed in one application
- Concrete is supplied with the exact amount of reinforcement that is required (no wastage)
- Reduces the need to store, cut, place and fix steel reinforcing mesh on site
- Can show an overall cost saving compared to traditionally placed concrete

ASPHALT VIASHIELD

VIASHIELD® is a hard wearing asphalt designed to meet the needs of the farming industry. The dense impermeable structure makes it ideal for a wide range of applications within the farm environment.

Excellent durability makes it ideal for surfaces that need to take farm machinery such as farm yards and all types of farm tracks and access roads.

APPLICATIONS

- Farm yards
- Farm tracks
- Livestock housing
- Animal food storage areas
- Silage clamps
- Chemical use

FEATURES AND BENEFITS

- Dense and impermeable
- Highly resistant to acid and abrasion
- Easily maintained
- Smooth, uniform surface
- Improved cleanliness

VIASHIELD®

AGGREGATE AGGREGATE SOLUTIONS

neogem is our brand of premium and high-performance aggregates, designed to meet the needs of modern day agricultural requirements.

neogem
Agricultural

Learn more about our range:

Cattle Bedding

A high-quality blend of sand-based cattle bedding.

Neutra-Agg

Neutra-Agg is a 100% natural aglime fertiliser solution, designed to help correct soil pH by neutralising acidity, to increase conditions for effective nutrient uptake in crops and pastures. We produce and manufacture all our Neutra-Agg products from our own quarries and limestone sources, to ensure exceptional quality and customer satisfaction.

BENEFITS

- **Cattle Bedding –**
Comfortable for livestock, reduces, prevents the spread of pathogens, reduces slips and falls, compared to other bedding medias.
- **Neutra-Agg –**
High calcium content, Helps strengthen root systems and easy to apply when using standard spreading equipment.
